You also will have got to eliminate 3 screws on the energy supply safeguard to gain access to the power supply.. There can be a fuse in the energy source, That is certainly situated under the document catch holder.. Just look to the best of the on off switch, You will find 2 gold phillips screws in that cover.

1. [xerox fax driver](#)

Remove those and appear the cover up away, it will POP, there will be a tab holding it in location, so it will have alittle opposition in eliminating it.. Some have got 1 some have got 2 fuses If the source is poor
